PRESS RELEASE

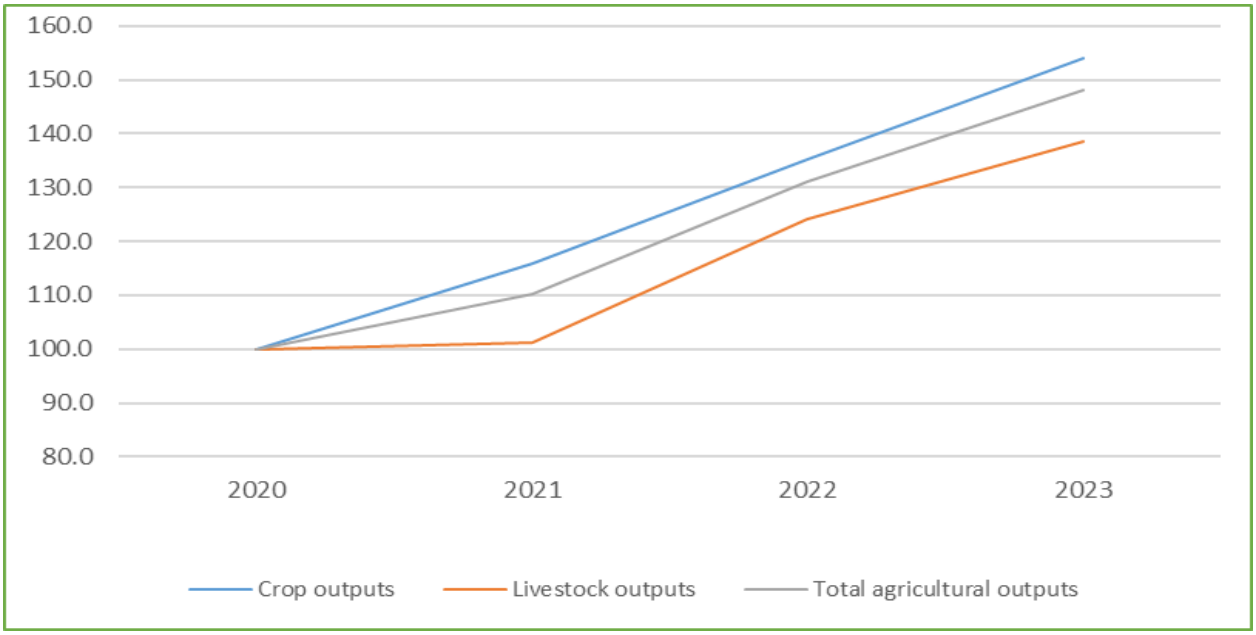
Output Price Index and Prices in Agriculture, 2020-2023

16.02.2024
The Kosovo Statistics Agency (KAS) has released the Output Price Index and Prices in Agriculture for the years 2020-2023.

The total index of agricultural outputs has increased in 2023, compared to 2022

This publication is based on the collection of prices of local agricultural outputs in Kosovo. Data collection is done in the market, farms and other places where the prices of agricultural outputs can be collected.

Price index of crop, livestock and total agricultural outputs for the years 2020-2023, (2020=100)



Annual change of the index in 2023 compared to 2022 in %

In 2023, the annual price index of crop outputs increased by (14.0%), compared to 2022. Meanwhile, the price index of livestock outputs increased by (11.6%) in 2023, compared to 2022. While, the total price index of agricultural outputs increased by (13.1%) in 2023, compared to 2022.

Change in %, year 2023 to year 2022

Description	2022	2023	Change in %
Crop outputs	135.1	154.0	14.0
Livestock outputs	124.2	138.7	11.6
Total agricultural outputs	131.0	148.2	13.1

Annual change of the index in 2023 compared to 2020 in %

In 2023, the annual price index of crop outputs increased by 54.0%, compared to 2020. Meanwhile, the price index of livestock outputs increased by 38.7% in 2023, compared to 2020.

However, the annual total index of prices of agricultural outputs increased by 48.2% in 2023, compared to 2020.

Change in %, year 2023 to year 2020

Description	2020	2023	Change in %
Crop outputs	100.0	154.0	54.0
Livestock outputs	100.0	138.7	38.7
Total agricultural outputs	100.0	148.2	48.2

The outputs which form the basis for the price index of agricultural outputs are divided into two main groups: Crop outputs and livestock outputs. Within crop outputs, the prices have been collected for the following groups: cereals, fodder crop, vegetables, potatoes and fruits. In livestock outputs, prices are aggregated for animal and animal products. Within livestock, prices are collected for four categories of animals: cattle, sheep, pigs and chickens. These prices are based on the live weight of the animals. Within livestock outputs, the prices have been collected for: milk, eggs and honey. All prices are calculated in Euros and the units of measurement are: kg, liter and piece.
